

Official Statement No. 09

Use of Methodologies Developed by Cercarbono by other Standards and Countries

Date: 14.07.2023

From: **Voluntary carbon certification program of Cercarbono**
To: Standards, Developers and Countries.

The voluntary carbon certification program of Cercarbono is pleased to announce that it has opened the possibility for other private carbon standards or countries that have or are developing their own standard to utilize the methodologies developed by Cercarbono.

This will enable other private standards or country standards to certify projects formulated using robust, proven methodologies that have been widely accepted by many developers.

The use of methodologies developed by Cercarbono must be approved by both Cercarbono and the private standards or country standards that wish to use them, without incurring a fee for their inclusion in the standard. Private standards or country standards will pay a **fee of USD 0.05 per carbon credit** at the time of certification, prior to issuance.

We invite interested private standards or country standards that are interested in the use and adoption of the methodologies developed by Cercarbono to contact us via email at info@cercarbono.com and obtain further details regarding the terms and conditions of this new service.

Cordially,

Alex Saer
CEO
Cercarbono
