

**Response to Comments from the Public Consultation on  
the Tool to Report Contributions of Circular Economy  
Initiatives to the Sustainable Development Goals**

No.	Entity	Text/Comment	tool section	Answer
1	Fundación Banco de Residuos del Litoral Argentino	Alliances for a Disruptive Circular Economy Posadas Misiones Program		Thank you very much for your comment.
2	SOS Tierra	Main topics to cover		Thank you very much for your comment.
3	ECOPOSITIVA SAS ESP	We are interested in participating.		If you are interested in starting the process, please write to <a href="mailto:globalzerowaste@cercarbono.com">globalzerowaste@cercarbono.com</a> .
4	ALSEC ALIMENTOS SECOS SAS	Good morning.  I hope you are doing well.  ¿How can we make investments under sustainable development standards attractive to senior managers and have more commitment?  I stay tuned		If you are interested in starting the process, please write to <a href="mailto:globalzerowaste@cercarbono.com">globalzerowaste@cercarbono.com</a> .
5	BIOFIX CONSULTORIA SAS	Matrix Given the scope contemplated by the PCEM whose actions can be directed not only towards recycling activities, but also collection, reuse and reduction within the same monitoring plan, the PCEM activity to which it attends should NOT be segmented in the matrix the SDGs,	In this case, it is recommended to do the report sheet twice. In other words, make a report sheet for each PCEM activity.  All ODS tool documents must be uploaded to the support documents folder.	At the top of each report sheet, "PCEM Activity" is specified. For each type of activity that a PCEM has, the respective report can be made, and this box displays a drop-down list that coincides with that of the VPCE.  Regarding the rubric, it must be signed by the OVV in the event of verification, it is the latter who uploads it to the registration platform.

		<p>since as it was well explained in the guide, the goals of each objective can address a specific activity, therefore, limiting one type of activity in the matrix, when the PCEM contemplates implementing several, would underestimate the results.</p> <p>In the event that it is necessary to divide the PCEM actions, it could be grouped into two blocks, as established in the VPCE protocol.</p> <p>1. Reduction of materials 2. Recirculation of materials, which includes:</p> <ul style="list-style-type: none"> <li>• Collection</li> <li>• Reuse</li> <li>• Recycling</li> <li>• Recovery</li> </ul> <p>Rubric for review by the ODS I suggest defining the scope of the rubric, if the document would rest clearly on the documentation of the platform or if it is necessary to</p>
